

- File types should be js + jsx + scss.
- Folder structure:
  - public/images for static images.
  - src/images for dynamic images (dummy data images).
  - src/services for api calls (dummy data for the test).
  - src/components for other react components.
  - src/pages for router pages.
- Data should be passed via props or returned by an api.
- Should depend on two colors in css variables ( --primary-color , --secondary-color ).
- Should use lazy loading at least at one component.
- Shouldn't use hooks.
- Shouldn't use redux.
